Ingestion: Give plenty of water to drink. Never give anything by mouth to an unconscious person. Seek medical advice.

Medical attention and special treatment:

Basic aid, decontamination, symptomatic treatment.

Note for physicians

Check blood pressure and pulse rate frequently since bradycardia and hypotension are possible. Provide supportive measures for respiratory and cardiac function. Give artificial respiration if signs of paralysis appear. Additional therapeutic measures involve elimination of the substance from the body or acceleration of its excretion (gastro-lavage, saline laxatives). No specific antidote known.

Contraindications: Absorption promoting agents such as alcoholic beverages and milk. Oils and fats are of no special significance due to the low liposolubility of the active ingredient.

Section 5 - Fire Fighting Measures

Hazards from combustion products: In the event of a fire, the formation of hydrogen chloride, hydrogen cyanide, carbon monoxide must be anticipated. Do not breath fumes.

Precautions for fire fighters and special protective equipment: Not flammable under normal conditions of use. Fire fighters to wear self-contained breathing apparatus and full protective clothing.

Suitable Extinguishing Media: Water jet, Water fog (or if unavailable fine water spray), foam, dry agent (carbon dioxide, dry chemical powder)and sand.

Section 6 - Accidental Release Measures

Methods and materials for containment and clean up: Contain - prevent run off into drains and waterways. Use absorbent (soil, sand or other inert material). Collect and seal in properly labelled containers. If contamination of sewers or waterways has occurred advise local emergency services.

Section 7 - Handling and Storage

Conditions for safe storage: Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Keep containers closed when not in use - check regularly for leaks.

Precautions for safe handling: Keep out of reach of children. Avoid skin and eye contact.

Section 8 - Exposure Controls and Personal Protection

Occupational Exposure Limits: No value assigned for this specific material by the National Occupational Health and Safety Commission.

Engineering controls: Natural ventilation should be adequate under normal use conditions.

Personal Protective Equipment: Personal Protective Measures: Avoid contact with eyes, skin and clothing during spraying. Do not inhale spray mist. Personal Protective Equipment: Not required.
Industrial Hygiene: If clothing becomes contaminated with product or wet with spray, remove clothing immediately. If product or spray on skin, immediately wash the area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash contaminated clothing with detergent and water.
